Lisa Gambino, A2Z Computer Help

My name is Lisa Gambino and I am a Certified Computer Technician and Certified Professional Secretary/Personal Assistant....

I graduated from the Sawyer Business School receiving certification as a Professional Secretary/Word Processor. Additionally, I attended Ocean County Vocational & Technical School for Computer Repair Technician certification. I now hold credentials as a Certified Professional Secretary/Word Processor, as well as Certified Computer Repair Technician, along with additional Software Certifications from Microsoft and Adobe.

In addition to being a member of [South Jersey Women In Business](#), I am a member of the [Business and Professional Women of Southern Ocean County](#) and hold an elected officer position, as well as being the webmaster for the organization's website. I am very much interested in other such groups as well as networking and continuing education.

The name of my one-woman business is A2Z Computer Help and it is your local source for personal computer repair, laptop repair, data recovery, hardware/software installations, virus and spyware removal, wireless networking installations, website design, digital photography, as well as training (I was an instructor for 3 semesters at Ocean County Vocational & Technical School for the Digital Photography Class).

I am the Property Manager and Personal Assistant for an Entrepreneur in Monmouth County.

I enjoy being the “go-to” person for people who have been overwhelmed by the complexities of modern technology. My knowledge, patience, and courtesy have afforded me a loyal client base, because I realize that the focus, which comes so easily to me, is almost a mystery to many.
